Calsonic Kansei Corporation

Calsonic Kansei to Exhibit at the 17th Shanghai International Automobile Industry Exhibition

Calsonic Kansei Group will participate as an exhibitor in the Auto Shanghai 2017 (17th Shanghai International Automobile Industry Exhibition; also known as the Shanghai Motor Show) to be held from April 19 to 28 in Shanghai.

This time Calsonic Kansei will exhibit on its developmental concept of “Green & Comfort.” Exhibits will include energy management technologies such as the SUS Core Exhaust Heat Recovery Unit and Sheet Metal Turbine Housing, technologies revolutionizing the cabins of vehicles such as a mockup of the Human-Max Cockpit, and a wide range of products that are produced in China and supplied to automotive manufacturers. This is to promote Calsonic Kansei’s latest technologies and products that seek to meet the increasing Chinese demand for eco-friendliness, and its pursuit of comfort.

In addition, there are plans to showcase the businesses of Calsonic Kansei China Holding Company, which is responsible for businesses in China, as well as the development framework, testing capabilities, production engineering capabilities, and examples of developments in China.

Calsonic Kansei Group contributes towards realizing a sustainable society as a global automotive company inspired to be world-leading in innovation and Monozukuri.
